About Me

Innovative software developer skilled in Java, Python, and web technologies. Passionate about building scalable solutions, full-stack development, and exploring machine learning. Strong communicator and proactive team player with experience mentoring juniors and leading technical projects.

Education

Parul University, Vadodara 2023–2027
Bachelor of Technology (CSE Core) CGPA: 8.54
Studying core computer science with focus on programming, algorithms, and software development.

IIT Madras, Chennai 2023–Present
BS degree in Data Science and Applications CGPA: 7.04
Studying data science with emphasis on analytics, machine learning, and programming.

Experience

Associate Software Engineer Intern – ServiceNow, Hyderabad May 2026 - July 2026

- Developed vsf-mcp, a Model Context Protocol server enabling Claude authenticated access to ServiceNow VSF instances, with secure OAuth 2.0 + PKCE flow and 30+ environment validation checks..
- Built agentic SDLC hooks and bundled skills (ATF test generation, code coverage estimation, instance scan orchestration, test data generation), shifting workflows from tool-centric to conversation-driven outcomes.

Operation Intern, Training and Placement Cell July 2026 - Present

- Led TNP cell at Parul University, managing CSE/IT placements and coordinating with companies.
- Mentored juniors in resumes, interviews, and technical skills while organizing workshops and placement drives.

Projects

Pandas Documentation Assistant (RAG + Mistral-7B) GitHub

- Developed an AI-powered chatbot for the Pandas library using a fine-tuned Mistral-7B-Instruct-v0.2 and a FAISS vector database, creating a searchable knowledge base from the official documentation.
- Built a Gradio user interface and engineered the end-to-end RAG pipeline, including web scraping, data processing, and QLoRA-based fine-tuning to provide efficient and contextually accurate answers.

Study Room GitHub

- Developed a full-stack web application using Django and SQLite3 that enables students to find study partners, create and join study rooms, and collaborate through real-time chat.
- Implemented user authentication, profile management, and complete CRUD functionality for rooms, topics, and messages, with dynamic browsing and activity feeds.

Brain OS GitHub

- Built an AI-powered knowledge and memory system that organizes, connects, and retrieves information intelligently.
- Implemented AI-driven features including semantic search, contextual memory, document understanding, automated summarization, knowledge linking, and personalized retrieval.

Skills

- **Languages:** Java, Python, C, C++, HTML, CSS, JavaScript
- **Frameworks:** Django, Flask, FastAPI
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite
- **Machine Learning:** Scikit-learn, PyTorch, Pandas, NumPy, Matplotlib
- **Development Tools IDEs :** VS Code, Replit, Jupyter Notebook, Anaconda, Google Colab, Spyder and Pycharm
- **Soft Skills:** Leadership, teamwork, communication, problem-solving, mentoring
